Q: WHAT IS YOUR DESIGN INSPIRATION?

A: Contemporary/Coastal style that brings in organic shapes starting with the stunning dining room table from EM Soberon made from felled trees from South America. Black resin fills crevices to highlight the color theme for the chairs and throughout the specific areas of silvers, blacks, and whites. The table was the inspiration for the animal print back of dining chairs. It's a zebra abstract with an inside cushion poly PVC that replicates silk-like qualities for easy cleaning.

Q: WHAT ARE THE LATEST TRENDS IN YOUR INDUSTRY?

A: Contemporary coastal looks bringing the inside out with color themes of nature, sky water, sand, and of course

Southwest Florida sunsets. We are also starting to see a mix of modern urban with Miami-inspired contemporary. White is the new black. White fabrics treated with Crypton are all the rage. This product is both child and adult proof protecting— against chocolate and wine.

Q: WHAT IS YOUR AREA OF SPECIALIZATION?

A: Furniture specifications, custom rug designs, window treatments, bedding soft goods, custom designed upholstered headboards and furniture.
